## NEW! RAPID ACCESS HEART CENTRE

St Andrew's Toowoomba Hospital is pleased to advise that it has opened the doors to the region's first Rapid Access Heart Centre, providing the Darling Downs community with a new 24/7 Emergency Cardiac Centre.

The much-anticipated service provides the local community with a wider choice of cardiac emergency care, along with access to the only dedicated Cardiac Catheter Laboratory in the region.

**Patients who are experiencing chest pain, tightness, palpitations, pressure or shortness of breath can present to the Rapid Access Heart Centre via Queensland Ambulance Service or as a walk-in self referral.**

No referral is required to access the Rapid Access Heart Centre.

The new service is delivered in partnership with the team of onsite Medical Officers and Cardiologists, with General Medical and Surgical resources also available if required. The Rapid Access Heart Centre is supported by St Andrew's existing 24-hour Intensive Care Unit, a Cardiac Medical Unit and dedicated Cardiac Catheter Laboratory.

As a growing regional centre, St Andrew's believes the Darling Downs community deserves a choice of emergency cardiac services when in urgent need.

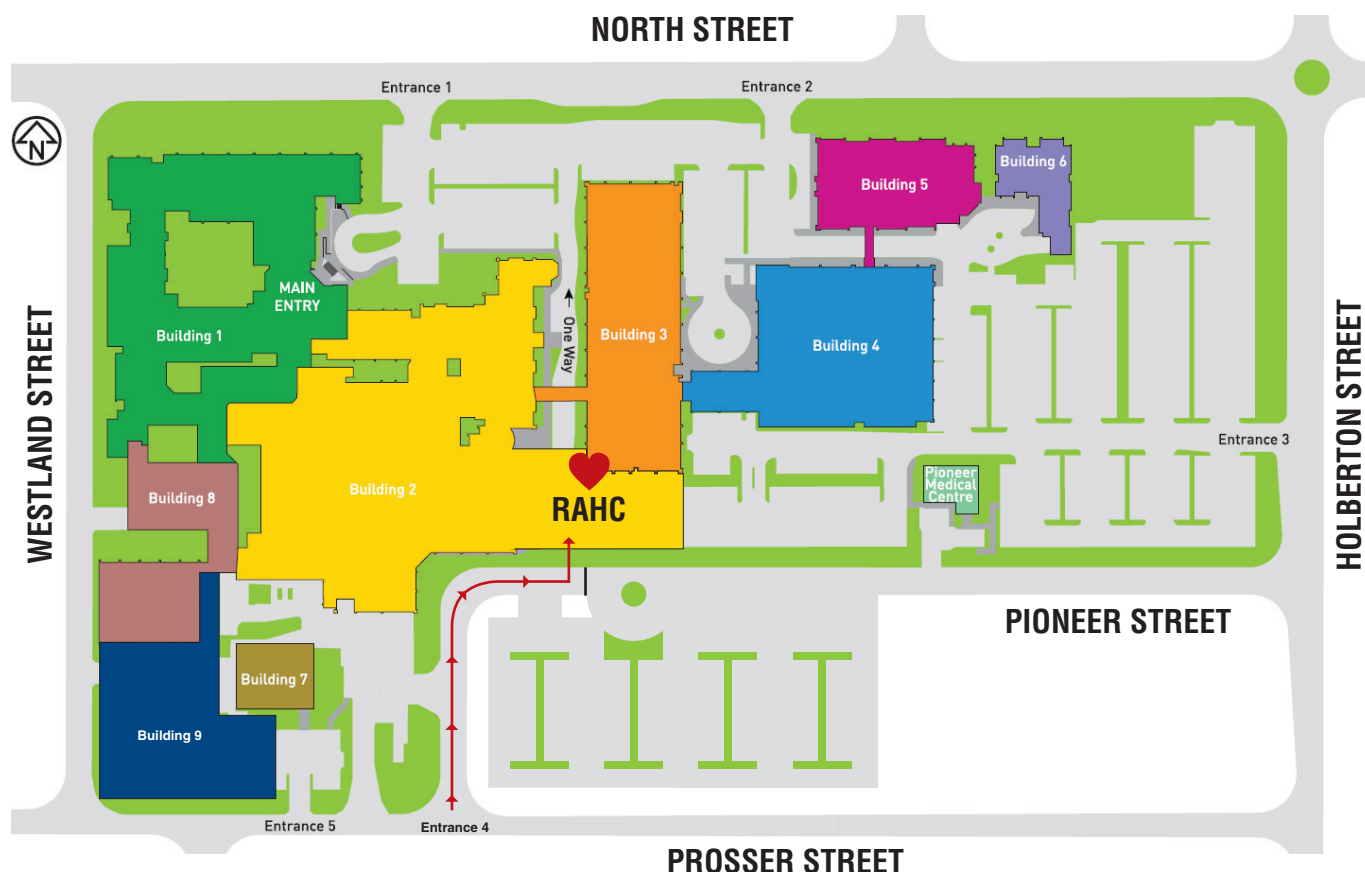

### Now open for all urgent heart related symptoms

Providing life-saving emergency cardiac services including:

- fast diagnostic procedures;
- stents for blocked arteries;
- insertion of cardiac devices.

St Andrew's Toowoomba Hospital has been offering cardiology services for over 15 years, through a team of highly trained, local onsite cardiologists who have performed over 7000 complex cardiac procedures in the region's only dedicated Cardiac Catheter Laboratory.

*A Facility Fee of \$180 applies to access the Rapid Access Heart Centre which is refunded upon a Hospital admission.*

#### Building 1:
